

MM Manufacturing

Safer and Healthier Products for Business and Home

LINE CARD

Since 1990, MM Mfg has been independently owned and operated by a small business person, Marianne Bennett Budin. "I really believe that if we invent, manufacture and distribute products, we'd have a healthier and safer world. My "Green" products and equipment lines have fewer toxins and waste than other products in both their manufacturing practices and materials.

My customers choose the quality products from those listed below or ask for our purchasing consultations. They include several of the largest gas and electric utilities, Fed. & State Govt., Transit Agencies, Water Districts, Dept. of Defense, and Art Supply and Paint retailers throughout the United States and Canada. I'd really like your business because I believe my company can, besides providing quality products, get the job done when a customer trusts us with their purchase order.
